Media, Operations, Staff & Volunteer Credentialing

Custom Gate Entry Passes

Why Sports Systems?

- Full customization, experience with more than 3,000 events, and web-delivered technology - Software as Service, to make implementation painless

NCAA

"Sports Systems simplifies the entire process of managing credentials with a user-friendly system that saves our staff a great deal of time. The media covering our event had nothing but high praise for the entire online application process. But the best part of using Sports Systems has been the treatment we've received from their staff. They are most helpful, completely knowledgeable, can relate to our needs, and are accessible at any time."

University of Oklahoma

"The Sports Systems credentials site accomplished the two goals we set for the program – to make the process more efficient and to make it more accurate. We were able to greatly reduce the time needed to accept requests and make responses, and we virtually eliminated errors. We also received numerous compliments from members of the media who found the process to be more seamless. Throw in the responsive customer service and you get a system that performs at every level."
